1957 ALL-AMERICA AWARD WINNER

Red Satin

F₁ HYBRID PETUNIA

ALL-AMERICA SELECTIONS

1957

New for 1957, and the proud recipient of an All-America Selections medal, Red Satin displays incredibly vivid and shining scarlet-red flowers. This marvelous red which so captivated the judges in the trials is strong and enduring everywhere. Heat and sunshine fail to fade the color; difficult growing conditions fail to prevent the F_1 hybrid multi-flora plants from blooming freely.

The plants are worthy of an award in themselves, for they attain a 10 to 12 inch globe-shaped form and then maintain that size and character right through the season instead of breaking down to a doughnut shape and blooming only around the edges. The persistent neatness of the plants

Red Satin

F₁ HYBRID PETUNIA

Red Satin

F. HYBRID PETUNIA

makes a perfect vehicle for the 2½ to 3 inch blooms. And such profusion! You can expect up to 30 blooms open at one time on each plant, not just a short peak of production, but steadily through the summer until frost.

Red Satin is admirably suited to low beds of dazzling color, to create a bright band of scarlet for borders or edgings, or for well-behaved, generously blooming pot plants.

9026 RED SATIN.....Trade Pkt. \$1.10; 1/32 oz. \$5.80; 1/16 oz. \$11.00;
1/8 oz. \$21.00; 1/4 oz. \$39.00; 1/2 oz. \$74.00;
oz. \$140.00

Electros: You may purchase electros of any of the Red Satin illustrations as follows:

Front cover (3 flowers) #3093J, \$55.00 per set.

Page 2 (bowl) #3094G, \$40.00 per set.

Page 3 (planted border) #3095H, \$47.50 per set.

This new marigold is a sure cure for the flaws that have plagued gardeners in growing Sunset Giants, and we feel sure it will quickly displace that variety. Here's why.

Sunset Giants were grown because they made huge flowers. But to do so they took a very long growing season, and for many gardeners there was the disappointment of having the plants come into bloom just in time to be nipped by frost. Crackerjack is weeks earlier than Sunset Giants, and decidedly ahead of Early Sunset Giants in maturity, making it the first large flowered marigold to come into bloom.

While some Sunset Giant flowers were certainly tremendous in size it is unfortunately true that this strain also included some medium sized blooms and some small single flowers. This appreciable percentage of unattractive singles injured the variety. Crackerjack, on the other hand, turns out uniformly large, double flowers measuring 4 to 5 inches across. We have never seen a single in our years of testing the strain either in our own breeding fields or in eastern trial grounds, so even under severe growing conditions you could expect virtually all double flowers.

But that's not all. In some areas Sunset Giants grew to an unwieldy height, becoming gangling and easy prey to high winds. Crackerjack plants are compact and sturdy, growing only to two-thirds the height of Sunset Giants.

As a final comparison, Sunset Giants had a habit of blooming down in the plant, covering some otherwise attractive flowers with foliage. Crackerjack holds its blooms in plain view, giving the effect of many more flowers than on the older variety.

Electros of this illustration
#3092H are available for
your catalog at \$47.50 per
set.

Crackerjack has a full marigold color range to offer — primrose, yellow, gold and orange. We grow the colors separately and blend them mechanically to insure perfect balance.

In spite of the many advantages this new marigold presents we are introducing it at a very moderate price. If you can use 20 lbs. or more, please ask us for a special quotation.

4996 CRACKERJACK (1956 crop only).....Oz. \$1.50; lb. \$15.00

Here we present an important advance in zinnias. Peppermint Stick Zinnia is a good variety, but there's a great improvement available this year — one of those fortunate forward steps that changes the aspect of something already well-liked into something really superior.

This superior flower is Ortho-Polka Zinnia.

As in the old Peppermint Stick, the flowers are different from all other zinnias in the fact that 70% are attractively striped, dotted or mottled in contrasting colors. But here the similarity ends, for Ortho-Polka blooms are BIG!

Peppermint Stick is a pumila style flower, and associated with this relatively small size bloom is the characteristic beehive shape. You can depend on the fact that the new strain will produce flowers twice this size, running over 4 inches in diameter, and with this doubling in size comes a distinct difference in the form as well. The giant Ortho-Polka bloom has the favorite zinnia flower type — broad, fully double, and with many large, well-separated petals. They are real beauties.

Colors in this bright mixture are extremely varied. They include combinations of pink and white, rose and white, red and white, lavender and white, purple and white, scarlet and yellow, orange and yellow, red and orange as well as some solidly colored flowers of each hue. This description can hardly do justice to the extent of the variation, for even on a single plant bearing rose and white flowers, for instance, there will be some blooms almost entirely white with flecks of rose on a few petals, others strongly white but with distinct rose stripes, still others with the proportion of rose and white evenly divided either in dots or stripes, and some strongly rose with white markings. You will occasionally find blooms that are divided right across the middle, with one half the flower one color and the other side a contrasting color — a most startling effect.

Ortho-Polka plants are equally superior. They are sturdy, well-foliaged, vigorous and resistant to heat and drouth, growing about 3 feet tall and making good cutting-length stems.

So here's a zinnia with a good future. It has novel coloring and marking, plenty of size and vigor for any garden, and flowers big enough to be eye-filling but not so oversize as to be top-heavy for cut flowers.

1586 ORTHO-POLKA.....Oz. \$2.00; lb. \$20.00

Special prices are in effect on quantities of 20 lbs. or more.

Electros of the Ortho-Polka plate on the back cover #3097K are available at \$70.00 and cut-downs like this one #3098H for \$47.50 per set.

Carnival

petunia

Electros of the color plate on this page, #3083G, are available at \$40.00 per set.

In the first season enough Carnival was sold to fill well over 4,000,000 packets, and a steady flow of re-orders indicates that even this large supply failed to equal the demand.

That demand was generated by telling the gardeners of the country all about Carnival. Feature articles, both in newspapers and in magazines, aroused interest in the F_2 breeding technique. Colored pictures in magazines, posters at the

Electros of the color plate on this page, #3084G, are available at \$40.00 per set.

Carnival

petunia

nival

petunia

point of sale, and first quality colored packets told the story even better than words. Over 10,000,000 people had a chance to see and read about Carnival in magazines, nearly 25,000,000 more saw it mentioned in their own newspapers, and uncounted millions heard about it on radio and television.

Carnival is an example of advanced breeding technique. It is an F_2 hybrid grandiflora with two great advantages over the old standard

varieties. First, it has 50% greater hybrid vigor than open pollinated strains, and this vigor not only makes lots of flowers but keeps the plants growing and producing longer, too. The Carnival plants are bedding type, growing 12 to 15 inches tall, and spreading to 2 feet across when full grown. Second, through patient testing of interaction between inbred lines Bodger research people have been able to obtain segregation in the second generation that provides an immense color range. It is no trick at all to stand in one spot and count 20 different colors, with most of the flowers enhanced by waved, ruffled or fringed petal edges. This series includes blue, white, crimson, rose, scarlet, salmon, salmon-pink, carmine, brilliant rose, light pink, rosy lavender, cream-pink, and variegated, starred or edged combinations of white and rose, white and pink, white and blue, plus numerous intermediate shades for which no common name is applicable.

So all in one season Carnival Petunia is a very widely planted variety. If you included Carnival in your list for 1956 this is no news to you, but if you waited to see if it would ring the bell, just listen to those cash registers!

	1/16 oz.	1/4 oz.	Oz.
9076 CARNIVAL	\$3.00	\$9.00	\$30.00

Special prices are in effect on pound or larger quantities.

Electros of the Carnival color plate #3082K on the facing page are available at \$70.00 per set.

Mardi Gras, like Carnival Petunia, is an F_2 hybrid mixture, and like Carnival it gains its greatest advantage over existing strains in the extremely wide color range and extra vigor this method of breeding affords.

Carefully tested F_1 snapdragon hybrids are combined in strict formula blending. By knowing exactly what to expect in the second generation of each of these hybrids it is possible to control the color balance of the mixture just as well as when standard strains are blended, but with the additional feature of color segregation within each of the hybrids. If you combine 5 varieties of standard snapdragons you end up with a mixture of 5 colors. But if you combine 5 snapdragon F_1 's you not only have the colors represented in the F_1 , but all the intergrading shades resulting from the segregation of each of them.

For instance, in the yellow series alone you can expect to see a very light chartreuse, a lemon-yellow, a canary-yellow, a golden yellow, gold, golden orange, orange, copper, and a warm scarlet-orange, plus degrees between each of these that can be separated by the eye and appreciated by a gardener without being possible to describe in words.

Mardi Gras is extremely vigorous and uniform in plant habit. The florets are closely placed on long-blooming stems, and while the plants are husky and long-lived they are of normal Maximum height.

In our trials and fields we have found that Mardri Gras is in bloom ahead of all other snapdragons, sometimes as much as two weeks ahead. This factor of earliness is well

worth having, for it enables the variety to reach full bloom ahead of the hottest weather which so seriously affects snapdragon quality.

A list which covers only the major colors would include white, light yellow, canary-yellow, gold, orange, copper, orange-scarlet, light pink, pink, rose-pink, brilliant rose, cream, scarlet, rosy lavender, lilac, cerise, cherry and deep, velvety red with many bi-tones and bi-colors — in short, just about every flower color except blue.

Because the seed the customer plants comes from F_1 hybrids it is unusually plump and vigorous, getting the seedlings off to a good start.

Please note that in spite of its many advantages, Mardi Gras is priced below many other snapdragon varieties and mixtures, an added inducement to help bring it to quick and widespread distribution.

1898 MARDI GRAS.....Oz. \$2.00, lb. \$20.00
Special prices are in effect on quantities of 20 lbs. or more.

Electros of this illustration

TERMS AND CONDITIONS OF DELIVERY

Prices quoted in this list go into effect immediately for spot sales and 1956 crop contracts, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate. Please note that it is generally to your advantage to order $\frac{1}{4}$ lb. rather than 3 ounces.

The minimum charge for each item billed will be fifty cents, due to the cost of handling small units.

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 1% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

BODGER SEEDS LTD. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fires, and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

PICTURES, PLATES AND PUBLICITY

EKTACHROMES: If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can usually supply high quality color photographs on a loan basis, the Ektachrome to be returned after use. Please write for information about availability of specific subjects in which you are interested.

PHOTOGRAPHS: we can supply, at cost price to us, professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8"x10", single weight glossy paper Each \$1.00

KODACHROME SLIDES: We can supply high-fidelity 35mm slides (2"x2") of many of the flowers we grow. These are close-ups of individual flowers or groups, manufactured from our professional-size originals... Each .50c

HORTICULTURAL COLOR CHART: This is the most complete and useful compilation of horticultural colors available in the world. Assembled in two volumes of individual, unbound sheets which greatly facilitate color matching, the set is issued in collaboration with the Royal Horticultural Society and includes 200 pages with four graded tones of color on each page — a total of 800 different color blocks. The descriptive material includes equivalent color names in four other systems (such as Ridgeway), the synonyms in six foreign languages, and horticultural examples (for instance, color block 640/2 represents the color seen in *Scilla campanularia*). In the Bodger catalog the sweet peas, which are frequently distinguished by minor color differences, are adequately described by one or two sets of figures taken from this color chart.

For the immense versatility and wide acceptance in horticulture the price is very low. Complete set of two volumes, just \$12.00

PUBLICITY MATERIAL: Each spring we send a series of releases of garden information to hundreds of newspapers, radio and television stations, and magazines. They are widely used by garden editors. If you have need for this type of material, or if you have a suggestion to make concerning the addition of a publication or station to our list, just drop us a line and we'll be glad to comply. The service is free.

PICTURES, PLATES AND PUBLICITY (con't.)

ELECTROS: We can supply electrotypes for use in printed matter of a great number of the pictures offered on the preceding page. 120 screen, usually square finish. Chosen from our Electro Catalog, our seed catalogs, or a selection of photos, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order. Prices below apply to copper. For nickelsteel, add 25%.

COLOR PLATES: We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order.

Electros and Color Plates are supplied unmounted (patent base) unless mounting is specifically requested. There is an additional charge of 25% for mounting. If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

ELECTRO PRICES ARE AS FOLLOWS:

Note: Our electro prices directly reflect the standard electrotyper's scale in Los Angeles, which in turn reflects the high wages now paid in the engraving industry. We cannot control this. Before ordering, consult your printer. In some localities he may be able to have engravings made at lower cost than our prices.

K.....	Larger.....	13.00	70.00

If you print by lithography we can supply dot reproduction proofs of any of our color plates for easy conversion to offset printing. Cost is \$16.00 per set, regardless of size.

ASTERS

All Asters listed here can be grown by the home gardener wherever Asters are popular. The non-resistant Giants require care to avoid wilt infested ground, but yield tremendous "show" blooms for the careful gardener. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

PRINCESS ASTERS (BODGER)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

ASTER BEDDING PRINCESS WILT RESISTANT (Marsha type)

New, compact branching plant form (identical with that of the variety Princess Marsha) 20"-24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing. These varieties are so superior in plant and flower that we have dropped the old Princess strain from our catalog.

ASTER SINGLE RAINBOW WILT RESISTANT (f)

Attractive single cutting Asters widely used by market growers. Medium-sized, daisy-like flowers in pink, light blue, rose, purple, crimson and white on long stems with excellent keeping qualities. Not the same as the old Single Giants of California.

....1054	UPRIGHT MIXTURE, habit allows plant to be cut as a bunch	1.35	12.00
....1056	BRANCHING MIXTURE (single Chinensis), for continued cutting	1.15	9.00

ASTER BALL VARIETIES (f) WILT RESISTANT

A new race of large, all-double florist's cutflower asters yielding long stems under cloth or glass. Flowers normally bloom in mid- or late-August but can be flowered under lights earlier or in the spring. These top-quality asters are the successors to Royals for critical florist's growing.

		Per oz.	Per lb.

....7136 EXTRA CHOICE MIXED, newest and brightest colors..	2.75
....7138 CHOICE MIXED	2.25

SWEET PEA ZVOLANEK MULTIFLORA (af)

A garden sweet pea more vigorous than Early Spencers, yet true winter flowering for florists. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the Early Spencers. We recommend this.

	Per lb.
....8736 BEAUTY ROSE, American Beauty color (727/1)	5.00
....8744 DEEP ROSE (27/1)	5.00
....8746 ELK'S PURPLE, deep purple	5.00

....8780 MIXED	4.00

SWEET PEA ZVOLANEK FLORIBUNDA (af)

Like Multifloras in the characteristic of extra florets, but of Spring Flowering maturity like the Cuthbertsons.

....8940 CHOICE MIXED	4.50
-----------------------------	------

SWEET PEA ZVOLANEK'S PLENTIFLORA (af)

Multiple-floret stems of much the same vigor and character as the Multifloras, except that this variety is of the Late Spencer maturity.

....8980 CHOICE MIXED	4.50
-----------------------------	------

SWEET PEA LITTLE SWEETHEART

....8156 LITTLE SWEETHEART MIXED, grows to a height of only .8 inches but bears full size flowers, blooms covering the rounded, bushy plants. A good edging or border subject (Per oz. 2.00).....	20.00
--	-------
